Personal Profile

Embedded software engineer with four years' experience developing Linux kernel-level GPU drivers at ARM, spanning Linux, Android, and macOS platforms. Strong background in low-level systems programming, cross-functional collaboration with hardware teams, and Agile development practices. Experience debugging driver issues under tight release deadlines while communicating clearly across technical and non-technical stakeholders. Seeking to return to a software engineering role where I can apply this systems-level expertise.

Employment History

Software Engineer – ARM 📍 Manchester, UK

📅 Apr 2021 – Jan 2025

Responsibilities: Designed, developed, and maintained Linux kernel-level drivers for ARM Mali GPUs. Root-causing and resolving kernel-level driver bugs against tight product release deadlines. Worked collaboratively within my team and alongside hardware engineers to bring up new GPUs according to specification, developing drivers for Linux, Android, and macOS platforms. Responded to customer requests and resolved reported issues, while maintaining, testing, and developing a large, collaborative codebase. Participated deeply in code reviews, sprint planning, and technical discussions within an Agile Scrum team.

Outbound Warehouse Supervisor – Office 📍 Kilmarnock, UK

📅 Oct 2025 – current

Responsibilities: Individually manage outbound logistics. Coordinate between multiple teams to ensure smooth operations. Diagnose and resolve ongoing problems with workflows and operations. Built and deployed a script for automating end-of-shift reporting, eliminating human error from the process. Introduced excel formulas to streamline recurring tasks & simplify day-to-day reporting.

Additional Experience

Bar Supervisor - Revolution Bar Group 📍 Glasgow, UK

📅 July 2018 – Apr 2021

Waiter - Pendulum Bar and Grill

📍 Paisley, UK

📅 July 2016 – July 2018

Education

BSc. Computer Games Technology – 1st Class Honours 📍 UWS

📅 2017 - 2020

HND Games Development – A

📍 West College Scotland

📅 2016 - 2017

HNC Games Development – A

📍 West College Scotland

📅 2015 - 2016

Technologies & Languages

Languages – C/C++, Python, Bash.

Technologies – Git, GitLab, Gerrit, Jira, VS Code, Linux, Unity.
